

API reference 

RegistrationState Class

Represents the current state of user registration with the Meta Wearables platform. Each state can optionally contain a registration error if the state transition was caused by an error.

Signature

sealed class RegistrationState

Properties

error :

[RegistrationError?](#)

[Get]

An optional registration error associated with this state

Signature

open val error: RegistrationError? = null

Inner Classes

Unavailable Class

Extends [RegistrationState](#)

Modifiers: final

Registration is not currently available, typically due to system constraints.

Signature

data class Unavailable(val error: RegistrationError? = null) : RegistrationState

Unavailable (error)

Signature

```
constructor(error: RegistrationError? = null)
```

Parameters

error: [RegistrationError?](#) An optional registration error that caused this state

Returns

`RegistrationState.Unavailable`

Properties

error:
[RegistrationError?](#)
[Get]

An optional registration error that caused this state

Signature

```
open override val error: RegistrationError? = null
```

Available Class

Extends [RegistrationState](#)

Modifiers: final

Registration is available and can be initiated.

Signature

```
data class Available(val error: RegistrationError? = null) : RegistrationState
```

Constructors

```
constructor(error: RegistrationError? = null)
```

Parameters

error: [RegistrationError?](#) An optional registration error that caused this state

Returns

`RegistrationState.Available`

Properties

error:

[RegistrationError?](#)

[Get]

An optional registration error that caused this state

Signature

```
open override val error: RegistrationError? = null
```

Unregistering Class

Extends [RegistrationState](#)

Modifiers: final

Unregistration process is currently in progress.

Signature

```
data class Unregistering(val error: RegistrationError? = null) : RegistrationState
```

Constructors

```
constructor(error: RegistrationError? = null)
```

Parameters

error: [RegistrationError?](#) An optional registration error that caused this state

Returns

[RegistrationState.Unregistering](#)

Properties

error:
[RegistrationError?](#)
[Get]

An optional registration error that caused this state

Signature

```
open override val error: RegistrationError? = null
```

Registered Class

Extends [RegistrationState](#)

Modifiers: final

User is successfully registered with the platform.

Signature

```
data class Registered(val error: RegistrationError? = null) : RegistrationState
```

Constructors

Registered(
error)

Signature

Parameters

`error: RegistrationError?` An optional registration error that caused this state

Returns

`RegistrationState.Registered`

Properties

`error:`

[RegistrationError?](#)

[Get]

An optional registration error that caused this state

Signature

```
open override val error: RegistrationError? = null
```

Registering Class

Extends [RegistrationState](#)

Modifiers: final

Registration process is currently in progress.

Signature

```
data class Registering(val error: RegistrationError? = null) : RegistrationState
```

Constructors

`Registering(`
`error)`

Signature

```
constructor(error: RegistrationError? = null)
```

Properties 

error :
[RegistrationError?](#)
[Get]

Returns

`RegistrationState.Registering`

An optional registration error that caused this state

Signature

```
open override val error:  
RegistrationError? = null
```
