

API reference 

VideoQuality Enum

Defines the quality levels available for video streaming from Meta Wearables devices. Higher quality levels provide better resolution but may require more bandwidth and processing power.

Signature

```
enum VideoQuality : Enum<VideoQuality>
```

Enumeration Constants

Member	Description
HIGH	High quality video streaming (720x1280 resolution)
MEDIUM	Medium quality video streaming (504x896 resolution)
LOW	Low quality video streaming (360x640 resolution)
