API reference

AutoDeviceSelector Class

Extends [DeviceSelector](#)

Modifiers: final

A device selector that automatically selects the best available device. Selects the first connected device from the devices list, falling back to the first device if none are connected.

Signature 🔗

```
class AutoDeviceSelector: DeviceSelector
```

Constructors 🔗

init (wearables)	Creates an auto device selector that monitors the given wearables interface for device changes.

Signature

```
public init( wearables:
WearablesInterface)
```

Parameters

wearables: [WearablesInterface](#) The wearables interface to monitor for available devices.

Properties 🔗

activeDevice	The currently active device identifier.

Functions 🔗

☰   ∞ Meta Wearables   🔍   Login   Register

Signature

```swift
public func activeDeviceStream() ->
AnyAsyncSequence<DeviceIdentifier>?
```

Returns

AnyAsyncSequence<[DeviceIdentifier?](...)>
