API reference

PermissionError Enum

Represents the specific types of errors that can occur during permission operations with Meta Wearables devices.

These errors help identify the root cause of permission failures for proper error handling and user communication.

Signature 🔗

```
enum PermissionError : Enum<PermissionError> , DatError
```

Enumeration Constants 🔗

Member	Description
NO_DEVICE	No wearable devices have been discovered or registered.
NO_DEVICE_WITH_CONNECTION	All discovered devices are powered off or disconnected.
COMPANION_APP_NOT_INSTALLED	The Meta AI companion app is not installed on the device.
CONNECTION_ERROR	A connection error occurred while communicating with the device.
REQUEST_IN_PROGRESS	A permission request is already in progress.
REQUEST_TIMEOUT	The permission request exceeded the allowed time limit.

INTERNAL_ERROR	An unexpected internal error occurred.

Properties 🔗

description : String
[Get]

Signature

```
