DeviceMetadata Class

Modifiers: final

Contains metadata information about a Meta Wearables device.

This data class provides essential information about a device's identity, availability status, and hardware type, which can be used for device management and feature detection.

Signature 🔗

```
data class DeviceMetadata(val name: String, val available: Boolean = false, val
deviceType: DeviceType = DeviceType.UNKNOWN, val firmwareInfo: String? = null,
val compatibility: DeviceCompatibility = DeviceCompatibility.COMPATIBLE)
```

Constructors 🔗

, deviceType,
firmwareInfo,
compatibility)

```
constructor(name: String, available:
Boolean = false, deviceType: DeviceType
= DeviceType.UNKNOWN, firmwareInfo:
String? = null, compatibility:
DeviceCompatibility =
DeviceCompatibility.COMPATIBLE)
```

Parameters

`name: String` The human-readable name of the device

`available: Boolean` Whether the device is currently available for connection and use

`deviceType: DeviceType` The specific type of Meta Wearables device

`firmwareInfo: String?` Optional firmware build version information for the device

`compatibility: DeviceCompatibility`

Returns

DeviceMetadata

Properties 🔗

available :
Boolean
[Get]

Whether the device is currently available for connection and use

Signature

```
val available: Boolean = false
```

compatibility :
DeviceCompatibility
[Get]

**Signature**

```
val compatibility: DeviceCompatibility
```
